As a skilled frontend engineer with close to two years of experience in web development, I possess expertise in both front-end and back-end development, utilizing frameworks such as React and Laravel. My proficiency extends to database management, having worked with MySQL, as well as in UI/UX design and software engineering. I am highly driven by the challenge of problem-solving and am passionate about creating user-friendly solutions. I am excited to leverage my skills and knowledge to contribute to the development and enhancement of online platforms while continuing to grow and gain valuable professional experience in the industry.
